The Creative Mind Behind TRI

LILI IS THE DESIGNER AND CREATOR OF TRI

Her passion for sustainable design and commitment to the planet have brought to life games that not only entertain but also inspire.

Every piece tells a story.

"TRI is not just a game; it's a commitment to design and the environment." – Lili

Products

TRI is a collection based on design and construction with wooden pieces that allow for the creation of complex and unique shapes. It combines the tradition of wooden toys with innovations in design, color, and sustainability

It is both a creative game and a design object, ideal for lovers of art and education, promoting skills such as motor skills, decision-making, imagination, and concentration. It explores concepts of geometry and balance, with same-sized pieces in six attractive colors and connectors of various shapes to expand construction possibilities.
